

# Access Hatch **Deckentüre** Installation Guide

**⚠ Please pass on to user/owner!**

## User & Safety Instructions

For damage which was caused due to improper installation or improper use, no liability can be assumed.

Safety instructions to avoid the risk of injury:

**Always operate with tension rod in ring eye!**

**Do not lean ladder on the hatch door!**

**Do not hold on to the hatch door!**

**Do not drop hatch door when detaching it!**

**⚠ Before installing the access hatch:**  
Glue sealing tape into the ceiling opening  
(see Installation Guide Connection System)

**1** Screw ring eye flush into catch.

**2** For easier installation:  
**Detach hatch door with concealed hinges.**

**3** Place **frame** in ceiling opening  
and **adjust**:

- even out the surrounding gap (max. 2 cm)  
- flush to ceiling and at right angles  
(remeasure diagonals)  
Underlay and **screw tight** (2x per side).

**4** Click hatch door  
back into place

**5** Align hatch door exactly  
Adjustments with the appropriate screws:

depth ↑↓  
width of gap left/right ↔  
width of gap catch side / hinge side ↑↓

**6** Adjust magnets for proper closing.

**⚠ Push insulating braid into gap,**  
Glue sealing tape onto frame.  
(see Installation Guide Connection System)

After completion of any other work on the ceiling:

**7** Mount cover profiles:  
Interlock. Test. Uncover adhesive tape. Press on firmly. Fix.  
(Installation Guide Cover Profiles)
